

Adding a news post

How to publish a new article to The Democrat.

1. Write the article

In PagesCMS (or your editor), create a new post. Give it a **title**, **date**, a **category** (News, Commentary, Media Release, Vale, Election or Podcast) and the body text.

2. Add the image

Upload the hero image. Save it into **assets/img/** named **post-<your-slug>-01.webp** (the slug is the lowercase, dash-separated title). Extra in-article photos can be -02, -03, etc.

3. Register it

Add an entry to **posts/index.json**:

`{"title","date","excerpt","image":"post-...-01.webp","file":"posts/<slug>.html","cat"}`. The newest entry shows as the lead story automatically.

4. Publish

Commit/save. The Democrat hub sorts by date, files the post under its category, and the homepage "Latest" strip updates itself. No code needed.
